## Abstracts

The global Dibasic Ester-based Solvent market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of % from 2025 to 2031.

Dibasic ester-based solvents are notably used in the treatment of metals and surface coatings, in paint formulations as well as in industrial cleaning. They are readily biodegradable, low VOC, non-toxic and eco-friendly; they address the strong growth in the demand for products meeting stricter environmental and use standards.

Dibasic esters are a group of solvents primarily used in various industrial applications, including coatings, cleaning agents, adhesives, and more. These solvents gained attention due to their relatively low toxicity and environmentally friendly properties\*. Growing environmental awareness and tightening regulations regarding volatile organic compounds (VOCs) and hazardous air pollutants (HAPs) drove the demand for environmentally friendly solvents like DBEs. DBEs are known for their low VOC content and lower environmental impact compared to traditional solvents.
