The global Dietary Palmitoleic Acid market size is predicted to grow from US\$ 286 million in 2025 to US\$ 433 million in 2032; it is expected to grow at a CAGR of 6.2% from 2026 to 2032.

Palmitoleic acid, also known as palmitoleate or (9Z)-hexadecenoate, belongs to the class of organic compounds known as long-chain fatty acids. These are fatty acids with an aliphatic tail that contains between 13 and 21 carbon atoms. Palmitoleic acid is a very hydrophobic molecule, practically insoluble (in water), and relatively neutral.

The dietary palmitoleic acid market is expanding as a significant component of the nutritional and dietary supplement industry. Palmitoleic acid is a monounsaturated omega-7 fatty acid found in certain plant and animal sources, offering potential health benefits. The market's growth is driven by the demand for natural sources of healthy fats that may support heart health, skin health, and metabolic functions. Dietary palmitoleic acid supplements provide a convenient way to incorporate this fatty acid into daily diets. As consumers focus on holistic wellness and functional nutrition, the dietary palmitoleic acid market is expected to continue growing, offering an essential dietary supplement ingredient that aligns with the increasing interest in overall health and well-being.
