Diamine oxidase (DAO) is an enzyme that your body makes to break down histamine from foods. If your body doesn't produce enough DAO, you may have diamine oxidase deficiency. ?Digestive Diamine Oxidase Enzyme for Supplements are over-the-counter products that restore the diamine oxidase enzyme in your body. They help break down histamine-rich foods and may reduce symptoms of histamine intolerance.

The growth of the DAO enzymes for supplements is driven by the rising cases of histamine intolerance coupled with the rising interest in natural remedies. Furthermore, the growing availability of digestive diamine oxidase supplements at online retailers is anticipated to fuel the demand for the market. The demand for digestive diamine oxidase (DAO) enzymes as supplements is primarily driven by the increasing awareness of histamine intolerance and its associated symptoms. Histamine intolerance in the field of medicine has gained more attention among healthcare professionals and the general public. For instance, the American Journal of Critical Nutrition states that 1% of the global population suffers from histamine tolerance. As more consumers become aware of histamine intolerance, there is a growing demand for natural ways to manage and reduce symptoms.
