An audio cable is a cable used to transfer analog or digital signals from an audio source to an amplifier or powered speaker. Cables are a critical component of a musical setup; they can be termed as vessels carrying the musical blood to the entire system. They connect the stereo receiver with many other equipment like TV, stereo system, musical instrument or another device. To ensure that the signal passes through one source to another effectively, it is important to have a quality audio cable fixed in place.
