In Digital A/V Decoders, every S/PDIF or HDMI digital audio source is connected to an input connector. Digital A/V Decoders are electronic modules that decode and process multiple surround sound audio channels, and are used with other amplified audio systems. Digital A/V Decoders have a display, and an infrared remote control feature. Audio, from the S/PDIF or HDMI source, is extracted and the video part of the signal is dissected into two precise HDMI outputs.
