Digital projectors are used instead of conventional film projectors to project digital movies. Digital cinemas are different from high-definition television and do not depend on the usage of television or aspect ratios, high-definition video standards, or frame rates. The resolution in digital cinema is represented by the horizontal pixel count; for 2K it is 2048 × 1080 or 2.2 megapixels and for 4K it is 4096 × 2160 or 8.8 megapixels. Typically, digital cinema is electronically distributed to cinema through media such as the Internet, fiber optics networks, and hard disks.
