Digital Dosing Pump is the high-end pump range for extended flow and pressure ranges. It includes sensor-based Flow Control and measurement functions for industrial applications. A diaphragm metering pump is a positive displacement pump designed to operate as a proportional dosing pump. It uses a flexible diaphragm in place of a piston to change the volume of the pump's chamber to increase and decrease pressure on the fluid inside.

The Digital Diaphragm Dosing Pump is an advanced liquid handling device that offers exceptional precision and control, perfectly aligning with the growing market trends. As industrial production and water treatment industries continue to expand, this pump provides customers with a reliable tool for precisely managing liquid addition and dosing processes. Its digital capabilities allow users to make precise dosage adjustments according to specific requirements, enhancing process stability and efficiency. Furthermore, the Digital Diaphragm Dosing Pump also offers remote monitoring and automation control capabilities, making it increasingly popular in modern industrial and water treatment systems.
