The global Digital Insurance Brokerage Service market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

Digital insurance brokerage services refer to services that use digital technology and online platforms to provide customers with comprehensive insurance solutions. Through functions such as comparing different insurance products, online insurance, and digital claims, digital insurance brokerage services aim to simplify the insurance purchase process, improve customer experience, and provide customers with convenient, transparent, and personalized insurance services.

The rise of digital insurance brokerage services marks the insurance industry's entry into a new era of digitalization and intelligence. This service not only provides customers with a more convenient and efficient way to purchase and manage insurance, but also brings insurance companies a broader market and a more efficient business operation model. Through the digital platform, customers can easily compare different insurance products, quickly complete the insurance process, and make claims in real time when necessary, which greatly improves the user experience. At the same time, digital insurance brokerage services have also promoted competition and innovation in the insurance market and promoted the inclusive and personalized development of insurance business.
