The global Digital Refractometers market size is predicted to grow from US\$ 213 million in 2025 to US\$ 318 million in 2031; it is expected to grow at a CAGR of 7.0% from 2025 to 2031.

A Refractometer is a precision optical instrument designed to measure the concentration or mixture ratio of water soluble fluids. It measures refractive index, the speed at which light passes through a liquid. The denser the liquid the slower the light will travel through it, and the higher its reading will be on the refractometer. There are four main refractometer types: Traditional Analog Refractometers, Digital Handheld Refractometers, Inline Process Control Refractometers and Refractive Index Sensors, and Desktop, Benchtop or Laboratory Refractometers.

Global Digital Refractometers key players include Atago, Anton paar, Reichert, Mettler-Toledo, VEE GEE Scientific, etc. Global top five manufacturers hold a share over 60%.

North America is the largest market, with a share about 25%, followed by Japan, and Europe, both have a share about 40 percent.

In terms of product, Digital handheld refractometers is the largest segment, with a share over 65%. And in terms of application, the largest application is Food and beverage industry, followed by Chemical & Petrochemical industry, etc.
