The global Dimethylmethoxy Chromanol market size is predicted to grow from US\$ 401 million in 2025 to US\$ 514 million in 2031; it is expected to grow at a CAGR of 4.3% from 2025 to 2031.

Dimethylmethoxy chromanol mainly works as an anti-oxidant in cosmetic products. Lipochroman-6 is a high potency anti-oxidant that's believed to inhibit tyrosinase activity and peroxynitrite formation- one of the main culprits behind lipide peroxidation and cell damage (2 huge skin agers). It's supposed to work by capturing free radical nitrogen and oxygen molecules in the body. Lipochroman-6 is a synthetic analog of gamma-tocopherol, but has been proven to have >20 times its anti-oxidant activity. It can therefore be used in very low concentrations. While this ingredient is a relatively new one, extensive data exists demonstrating it as a potent antioxidant. You can find it in skin care products such as facial moisturizer, sunscreen and anti-aging treatment.
