Dipalmitoyl Hydroxyproline is based on plant-derived hydroxyproline (Collagen Amino Acids) and represents one of the most powerful, state of the art, weapons against aging skin. This plant-derived biological delivery system for hydroxyproline which is a collagen amino acid with well characterized moisturizing activity is created by grafting palmitic acid onto the hydroxyproline. Dipalmitoyl Hydroxyproline is an overall anti-aging active ingredient for wrinkle correction, moisturization, and triple firming action (collagen fiber contraction, protection of dermal supporting tissue, anti-radical action). It also contains a hydroxyproline vehicle that moisturizes, strengthens, and rejuvenates the skin which helps to recover volume, suppleness, and former tone.
