## Abstracts

The global Direct Attach Cable market size is predicted to grow from US\$ 2514 million in 2025 to US\$ 8034 million in 2031; it is expected to grow at a CAGR of 21.4% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

DAC cables, or “Direct Attach Cables”, are a form of shielded high speed cable with SFP connectors on either end. They can be used to connect switches to routers and/or servers.

The increasing demand for next-generation high speed pluggable-products is boosting the growth of the market over the forecast period. However, the high costs associated with the set-up of optical cable networks, as well as the expensive raw materials used in the manufacture of optical cables, for instance, silica and plastic, are additional factors that hinder the growth of the market.
