The report requires updating with new data and is sent in 48 hours after order is placed.

The global Dispersion Machine market size is predicted to grow from US\$ 120 million in 2025 to US\$ 141 million in 2031; it is expected to grow at a CAGR of 2.7% from 2025 to 2031.

Dispersing machines are used in all areas of industry where mixing of liquids or liquids with solids is required. A disperser will generate the shear force necessary to rapidly de-lump powders in a liquid. This de-lumping process is called dispersion. A disperser is a high-powered, low volume pump. Considering its substantially higher horsepower per gallon requirement, a disperser is an inefficient mixer.

Global Dispersion Machine key players include IKA, Netzsch, PRIMIX Corporation, Fluko, Silverson, etc. Global top five manufacturers hold a share over 30%.

China is the largest market, with a share about 25%, followed by US, and Europe, both have a share over 40 percent.

In terms of product, Frequency Control is the largest segment, with a share over 45%. And in terms of application, the largest application is laboratory, followed by Industrial.
