Disposable plastic pallet is an economical alternative to wooden pallet. Disposable plastic pallet are cost effective compared to plastic pallet and wooden pallet, as they are resistant and durable to damage. Manufacturers of disposable plastic pallet are preferring to provide lighter pallet for shipments. This reduces the amount of wear and tear for the equipment during transportation and as it is lighter, it also reduces the cost of shipment and transportation. Light weight of disposable plastic pallet increases payload capacity of the containers. The disposable plastic pallet minimizes costs associated to floor space, load weight, labor and sanitization, and helps in cutting the shipment expenditures and saving time. Also, factors such as decrease in product breakage due to pallet damage, drop in cleaning expenses, decline of repacking costs and problem-free disposable system significantly contributes to the growing applications of disposable plastic pallet in the logistics section of various industries like, grocery, pharmaceutical and automotive. Disposable plastic pallet is safe and easy to handle since they don't have splinters, nails or sharp edges. Furthermore, it eliminates wood as a source for contamination in food grade plants.
