Disposable Steam Heated Eye Masks are short-use or disposable wellness products featuring a built-in self-heating layer or reaction material that generates warm steam around the eye region (typically 40-45 °C) when opened. They are designed to relieve eye fatigue, dryness, strain from screens, or to provide a relaxation spa-like experience. The product is typically composed of non-woven fabric substrate, the heating/steam layer, optional aroma or medicinal micro-additives, and single-use packaging. Its supply chain is structured as follows: upstream includes suppliers of heating chemicals, non-woven fabrics, fragrances/medicinal additives; down-stream includes e-commerce platforms, pharmacy/beauty retail chains, travel retail channels and end-consumers. Regarding cost structure, raw materials account for about 55% of total cost, labour & equipment depreciation about 20%, packaging & logistics about 15%, and marketing & channel fees around 10%. In terms of downstream consumption, based on global user groups and usage frequency, heavy screen-use individuals are estimated to use on average 6-10 masks per year, although actual usage varies by region, culture and work intensity.
