The global Distributed Antenna Systems (DAS) market size is predicted to grow from US\$ 1673 million in 2025 to US\$ 2807 million in 2031; it is expected to grow at a CAGR of 9.0% from 2025 to 2031.

A Distributed Antenna System (DAS) involves the use of several antennas as opposed to one antenna to provide wireless coverage to the same area but with reduced total power and additional reliability. Often times a DAS uses RF directional couplers and/or wireless amplifiers to split and amplify the wireless signal from the source out to the distributed antennas. In many cases a DAS will use a combination of low loss coaxial cabling as well as fiber optic cabling supporting radio over fiber (RoF) technology to distribute the wireless signals to the antennas.

Global distributed antenna systems (DAS) key players include CommScope, Solid, Inc., JMA Wireless, Comba Telecom and Corning. Global top 5 manufacturers hold a share nearly 60%. Asia-Pacific is the largest market, with a share over 43%, followed by North America and Europe. In terms of product, hybrid DAS is the largest segment, with a share about 49%. And in terms of application, the largest application is office buildings, with a share about 20%.
