The report requires updating with new data and is sent in 48 hours after order is placed.

The global DNA Paternity Test Kit market size is predicted to grow from US\$ 99 million in 2025 to US\$ 153 million in 2031; it is expected to grow at a CAGR of 7.5% from 2025 to 2031.

Global Use of Medicines 2023 shows that the U.S. market spent about US\$ 62.9 billion on medicines in 2022 on a net ex-factory basis. Overall growth slows as the Inflation Reduction Act (IRA) spends US\$64 billion to reduce prescription drug prices, and the adoption of new treatments is expected to increase over the next few years. Besides, ex-factory discounts and rebates in drug distribution, the impact of patent expiration, and generic or biosimilar competition will also affect the U.S. pharmaceutical market.
