The global Dodecenyl Succinic Acid market size is predicted to grow from US\$ 105 million in 2025 to US\$ 139 million in 2032; it is expected to grow at a CAGR of 4.1% from 2026 to 2032.

Dodecenyl succinic acid (abbreviated as T746) is a highly effective, oil-soluble industrial rust inhibitor suitable for the manufacture of rust-preventive turbine oils, hydraulic oils, gear oils, and greases. It provides excellent corrosion protection for ferrous and non-ferrous metals by forming a dense protective film on the metal surface. The typical addition amount is 0.02% to 0.8%.

Dodecenyl succinic acid is an important fine chemical intermediate, and its industrial chain is closely linked to the petrochemical industry. The upstream processes mainly rely on refinery by-products, with the core raw materials being tetrapropylene (dodecene) and maleic anhydride. Under heating conditions, the two substances are synthesized into dodecenyl succinic anhydride through an olefin addition reaction, and then hydrolyzed to obtain the acid. The technological barriers to its production lie in controlling the isomer composition and refining the product's color.

Global sales in 2025 are projected to be approximately 12,000 tons, with an average market price of approximately US\$8,926 per ton. The industry's gross profit margin is in the range of 15%–30%.

United States market for Dodecenyl Succinic Acid is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
