The global Door Control Hardware market size is predicted to grow from US$ 5191 million in 2025 to US$ 7457 million in 2031; it is expected to grow at a CAGR of 6.2% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Door control hardware mainly refers to hardware installed on non-profile door leaves such as frameless glass doors, including door closers, floor springs, hinges, latches, locks, door catches, etc., and has developed with the extension of door leaf functions. Because of its relatively independent functional attributes, it is also used in some profile door leaves. It has the functions of protecting the door frame and door body, realizing automatic and smooth closing of the door leaf, selective parking and access control. Door control hardware is an important implementation part of the intelligent management of modern public buildings. It is mainly used in passage doors in shopping malls, hotels, guesthouses, office buildings, residential building gates, exhibition halls, airports and other commercial and public places where people frequently come and go.

The market for door control hardware is driven by growing demand for enhanced building security, increasing construction of commercial and residential buildings, and the widespread adoption of access control systems in smart infrastructure. As urbanization accelerates and more smart buildings are developed, there is a heightened need for reliable and durable hardware components such as door closers, exit devices, hinges, and locks that support both manual and automated access systems. Additionally, rising safety regulations and building codes worldwide push for the

integration of fire-rated and ADA-compliant door control solutions. The increasing trend toward touchless and sensor-based entry systems, especially post-pandemic, also fuels innovation and demand in this market.
