A double cone mixer is a type of blending equipment used for the efficient and homogeneous mixing of dry or granular materials. It consists of two cone-shaped containers joined at their ends, creating a V-shaped chamber. The materials to be mixed are loaded into the chamber, and the mixer rotates, causing the materials to flow and blend together.

Double cone mixers offer efficient and gentle mixing of dry materials, making them a versatile choice for industries requiring homogeneous blending of granular or powdered substances.
