The global Double and Triple Offset Butterfly Valves market size is predicted to grow from US\$ 2002 million in 2025 to US\$ 2632 million in 2031; it is expected to grow at a CAGR of 4.7% from 2025 to 2031.

### Double Offset Butterfly Valve:

This popular valve is also known as a high performance butterfly valve. This valve has two stems offset from the center. This creates a cam action during the application's process.

Double offset butterfly valves are available in higher pressures than the zero offset style.

### Triple Offset Butterfly Valve:

With the triple offset butterfly valve there are three offsets. Two are placed in a similar position to the double offset butterfly valve, while the third offset is the geometry of the seating surface, creating a type of cone shape of the disc and seat. This cone angle, along with the two eccentric shaft offsets, allows the disc to seal against the seat with no friction.

Asia-Pacific is the fastest growing market.
