Double-sided cross-woven filament tape is a type of adhesive tape that is reinforced with strong fiberglass filaments running in both horizontal and vertical directions. This cross-woven construction gives the tape exceptional strength and durability. The tape is coated on both sides with a strong adhesive, allowing it to adhere to different surfaces securely. Double-sided cross-woven filament tape is commonly used for applications that require high tensile strength and strong bonding. It is often used for heavy-duty packaging, bundling, splicing, and securing objects that need extra reinforcement. The tape's unique construction and adhesive properties make it ideal for tasks that require a reliable and long-lasting bonding solution.
