A down pillow core refers to the inner part of a pillow that is filled with down feathers. Down feathers are soft, fine feathers that are found beneath the tougher exterior feathers of ducks and geese. They are highly valued for their superior insulating properties and their ability to provide warmth without adding much weight.

In recent years, with the improvement of people's living standards, there has been an increasing focus on the quality of sleep, and down pillow cores have attracted attention as high-end sleep products. Their soft texture and excellent warmth make them the preferred choice for consumers pursuing a high-quality sleeping experience. With the increase in health awareness and the growing demand for comfortable sleep, the down pillow core market is experiencing a new wave of development opportunities. More and more consumers are paying attention to the quality of sleep, and high-quality down pillow cores are gradually becoming synonymous with sleep health. With the continuous increase in consumer attention to sleep products, the down pillow core market is expected to maintain a stable growth trend.
