Down-The-Hole Drilling Pipes are specialized steel tubes used in drilling operations where a pneumatic or hydraulic hammer drives a drill bit at the bottom of the borehole. These pipes connect the surface drilling rig to the DTH hammer, transmitting the necessary force, torque, and compressed air or fluid to power the hammer and clear debris from the hole. DTH drilling pipes are designed for durability and strength, enabling efficient drilling through hard rock and other challenging subsurface conditions in applications such as mining, water well drilling, construction, and geothermal energy exploration.
