Draft Curtain is made of non-combustible material and hangs no less than 500 mm from the ceiling as a fixed or movable smoke barrier. The movable smoke blocking wall refers to the smoke blocking wall that automatically sags due to the action of temperature sensing, smoke sensing or other control equipment during a fire. Mainly used in high-rise or super-high-rise large shopping malls, office buildings and warehouses, etc., it can effectively block the lateral flow of smoke under the roof of the building, so as to improve the smoke exhaust effect in the smoke prevention zone, and play a certain role in ensuring the safety of people's lives and property. .
