According to our LPI (LP Information) latest study, the global Dried Fruits market size was valued at US\$ 935.1 million in 2023. With growing demand in downstream market, the Dried Fruits is forecast to a readjusted size of US\$ 1446.7 million by 2030 with a CAGR of 6.4% during review period.

The research report highlights the growth potential of the global Dried Fruits market. Dried Fruits are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Dried Fruits. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Dried Fruits market.

Dried fruit is a processed fruit in which most of the water is removed from fruit either through a natural procedure of sun drying or dehydrators. Both dried and fresh fruits are a rich source of antioxidants and fibers but in dried fruits, a small amount of vitamins is lost during the dehydration process.

Dried fruit market is gaining acceptance due to its easy snack to pack feature which avoids spoiling of fruits as quickly as fresh fruits. Furthermore, the market is witnessed to be propelling with its application in different product line.
