shows a good development trend.

Not only major domestic food companies have set foot in the field of dried mangoes, but many small agricultural product processing companies have also seen the profit potential of the market and further expanded the production of dried mangoes. At the same time, because its production process is relatively simple, some consumers have also begun to try to make dried mangoes at home, which further challenges brand manufacturers in the market.

The number of exported dried mangoes is also increasing in major mango producing countries such as Thailand, India, the Philippines and China. At the same time, with the popularity of e-commerce and cross-border trade, the international sales network of dried mangoes has become more smooth. This provides further development space for the market size of dried mangoes.

The market demand for dried mangoes has grown steadily. Consumers pay more and more attention to healthy nutrition and natural food, and the pure natural and additive-free characteristics of dried mangoes have been widely recognized.
