Midstream manufacturers design, fabricate, and assemble bollards, often integrating access control, safety sensors, and impact-resistant structures. Downstream, driveway security bollards are purchased by homeowners, residential developers, commercial property owners, parking facility operators, and perimeter security integrators, and are widely applied in private villas, gated communities, offices, retail locations, and high-security residential entrances, where demand is driven by rising concerns over property security, vehicle intrusion prevention, and automated access control.
