With the continuous expansion of downstream application areas, the growth will continue in the future. In recent years, China has rapidly grown into a manufacturing and technology powerhouse in the drone industry, with drone sales already accounting for 70% of the global market share. The global general aviation market declined in 2020 due to the outbreak of the New Crown Epidemic, but the global general aviation market rebounded in 2021 as the

impact of the epidemic gradually decreased. In 2021, a total of 3,456 general aviation aircrafts were delivered globally, a year-on-year increase of 9.2%, with a total value of \$25.3 billion, and general aviation aircraft deliveries have already exceeded the pre-epidemic level in 2019. Newly industrialized countries have become important markets for general aviation development. Brazil and South Africa are the earliest emerging market countries in the development of the general aviation market, with general aviation aircraft ownership exceeding 10,000 units. The BRICS countries of Brazil, Russia, India, China and South Africa have a total of about 45,000 general aviation aircraft, accounting for about 10% of the global share, and there is much room for future market development.
