The report requires updating with new data and is sent in 48 hours after order is placed.

The global Drone Software market size is predicted to grow from US\$ 3540 million in 2025 to US\$ 27060 million in 2031; it is expected to grow at a CAGR of 40.4% from 2025 to 2031.

Drone software is getting robust, y'all. In fact, in a recent project where engineers planted, tended, and harvested the first crop ever with robots (i.e., no human hand directly touched any part of the process), the software used for all of the robotics—the tractors and other machines needed—was repurposed from drone software.

Global Drone Software key players include Airware, Inc., 3D Robotics, Dreamhammer Inc., Dronedeploy Inc., etc.

North America is the largest market, with a share over 40%, followed by China, and Europe, both have a share about 30 percent.

In terms of product, Open Source is the largest segment, with a share nearly 85%. And in terms of application, the largest application is Construction, followed by Agriculture, Mining, etc.
