Drum Unloading System is a hygienic product to be used in food & beverage chemical, and pharmaceutical industries for low or high viscosity products.

System works on base of volumetrically conveying Tmx?ow Progressing Cavity Pump, which creates vacuum under the follower plate and that vacuum causes certain pressure on the material in drum, so that pump can have a constant suction.

Fully with CIP cleanable. This pump is also perfect for handling any liquid with low or high viscosity.

The system is equipped with a follower plate with silicon wiper which perfectly cleans the sides of the drum, leading to minimum product waste of less than 1%.

Tmx?ow range is compact, efficient and speed of system rates up to 3000 rpm and pressures up to 12 bar.
