Global Dry Etching Devices Market Growth 2023-2029

https://marketpublishers.com/r/G2CE0D3200ABEN.html
Date: February 2023
Pages: 116
Price: US$ 3,660.00 (Single User License)
ID: G2CE0D3200ABEN

Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Dry etching refers to the removal of material, typically a masked pattern of semiconductor material, by exposing the material to a bombardment of ions(usually a plasma of reactive gases such as fluorocarbons, oxygen, chlorine, boron trichloride; sometimes with addition of nitrogen, argon, helium and other gases) that dislodge portions of the material from the exposed surface.

LPI (LP Information)' newest research report, the “Dry Etching Devices Industry Forecast” looks at past sales and reviews total world Dry Etching Devices sales in 2022, providing a comprehensive analysis by region and market sector of projected Dry Etching Devices sales for 2023 through 2029. With Dry Etching Devices sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US$ millions of the world Dry Etching Devices industry.

This Insight Report provides a comprehensive analysis of the global Dry Etching Devices landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Dry Etching Devices portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global Dry Etching Devices market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Dry Etching Devices and breaks down the forecast by type, by application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced

view of the current state and future trajectory in the global Dry Etching Devices.

The global Dry Etching Devices market size is projected to grow from US$ million in 2022 to US$ million in 2029; it is expected to grow at a CAGR of % from 2023 to 2029.

United States market for Dry Etching Devices is estimated to increase from US$ million in 2022 to US$ million by 2029, at a CAGR of % from 2023 through 2029.

China market for Dry Etching Devices is estimated to increase from US$ million in 2022 to US$ million by 2029, at a CAGR of % from 2023 through 2029.

Europe market for Dry Etching Devices is estimated to increase from US$ million in 2022 to US$ million by 2029, at a CAGR of % from 2023 through 2029.

Global key Dry Etching Devices players cover Lam Research, TEL, Applied Materials, Hitachi High-Technologies, Oxford Instruments, ULVAC, SPTS Technologies, GigaLane and Plasma-Therm, etc. In terms of revenue, the global two largest companies occupied for a share nearly % in 2022.

This report presents a comprehensive overview, market shares, and growth opportunities of Dry Etching Devices market by product type, application, key manufacturers and key regions and countries.

Market Segmentation:

Segmentation by type

Inductively Coupled Plasma (ICP)

Capacitive Coupled Plasma (CCP)

Reactive Ion Etching (RIE)

Deep Reactive Ion Etching (DRIE)

Others

Segmentation by application

+357 96 030922
info@marketpublishers.com

MEMS

Power Device

Others

This report also splits the market by region:

Americas

United States

Canada

Mexico

Brazil

APAC

China

Japan

Korea

Southeast Asia

India

Australia

Europe

Germany

France

+357 96 030922
info@marketpublishers.com

UK

Italy

Russia

Middle East & Africa

Egypt

South Africa

Israel

Turkey

GCC Countries

The below companies that are profiled have been selected based on inputs gathered from primary experts and analyzing the company's coverage, product portfolio, its market penetration.

Lam Research

TEL

Applied Materials

Hitachi High-Technologies

Oxford Instruments

ULVAC

SPTS Technologies

GigaLane

Key Questions Addressed in this Report

What is the 10-year outlook for the global Dry Etching Devices market?

What factors are driving Dry Etching Devices market growth, globally and by region?

Which technologies are poised for the fastest growth by market and region?

How do Dry Etching Devices market opportunities vary by end market size?

How does Dry Etching Devices break out type, application?

What are the influences of COVID-19 and Russia-Ukraine war?
