## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Dry herb vaporizers heat a ground material to produce a vapor that houses the material's therapeutic properties. Unlike concentrate vaporizers – which can use wax, dabs, or liquids – dry herb vaporizers use a more “natural” form of material. Users typically grind this material themselves. Because vaporizers for dry herb use a more natural material, they are often regarded as having an excellent taste.
