The report requires updating with new data and is sent in 48 hours after order is placed.

DLC is Dry Liquid Concentrate, which means powdered liquid product masterbatch. It is troublesome to use in non-liquid formulations such as plastics, rubber, hot melt adhesives, powder coatings, etc. It is often necessary to pretreat the filler with a liquid coupling agent, which increases the process and is inconvenient to use in some factories without stirring and mixing equipment. At the same time, liquid products are not very convenient in transportation, weighing, feeding, dispersion, etc., and the powdered coupling agent products are more convenient in use, and can reduce pretreatment processes and reduce pollution. The product is a free-flowing powder, which is very convenient for weighing and use.
