A dry stack boat storage system is a type of storage facility where boats are stored on racks in a covered building. This system is designed to protect boats from the elements and keep them secure when not in use. Boats are typically stored on specially designed racks that can be stacked on top of each other to maximize space efficiency. When a boat owner wants to use their boat, they simply call ahead to have it retrieved from the rack and brought down to the water for them. Dry stack boat storage systems are popular in areas where space is limited and where boat owners want a convenient and secure storage option for their vessels.

The global Dry Stack Boat Storage System market size is projected to grow from US\$ million in 2023 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
