DTH (Down-The-Hole) Drill Pipe is a drill pipe used in down-the-hole drilling systems, specifically designed to transmit the rotary force of the drill rig and the air pressure driving force to the drill bit. The DTH system sends compressed air into the drill bit through the drill pipe, allowing the drill bit to directly break the rock at the bottom of the hole. This drill pipe is designed for deep hole drilling and is usually made of high-strength steel to withstand high pressure and high torque environments.
