The global Dual Output LDO Regulators market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

Dual Output LDOs are linear regulators that provide two independent regulated outputs. Unlike a single output LDO regulator, a Dual Output LDO is capable of providing a stabilized voltage output to two different loads at the same time. This design is useful in applications that require a multi-voltage power supply to reduce the number of regulators required, thus saving board space and cost.
