## Abstracts

The global Dual Port Tester market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

Dual port testers are 1G to 400G dual port test solutions for applications such as lab development and field testing, supporting existing and next generation pluggable optical modules. The ability to test two 400G ports simultaneously (including 1G, 100G, 200G, etc.) means that technicians can accomplish more in a day. The large number of ports makes fast, accurate testing critical. In addition, with dual port testing, technicians can test both primary and backup links under the same conditions, speeding up the testing process and reducing the likelihood of network failure.
