The global Dual Wheel Casters market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

The dual-wheel casters have a differential effect, so maneuverability is excellent. This means: Since the two wheels can also swivel in opposite directions, tandem castors can be moved more easily and have advantages over single furniture castors, making them ideal for a variety of medium to heavy lifting jobs. The double-wheel castors have a bracket made of high-quality materials such as plastic or steel, so they are very strong and at the same time do not damage the ground during use. The double-wheel castors with soft tread are especially suitable for sensitive floors such as tiles, parquet or laminate. Harder treads are better for soft ground conditions such as carpet. The double wheel castors are also available in conductive, washable and stainless steel versions for areas where hygiene regulations recommend regular cleaning and disinfection.
