A ducting flange is a type of flange designed for use with air ducts in ventilation, heating, and air conditioning (HVAC) systems. These flanges facilitate the connection of duct sections to each other or HVAC equipment, ensuring a secure and leak-proof assembly.

Ducting flanges are integral to the construction and maintenance of HVAC systems within residential, commercial, and industrial buildings, as well as in applications requiring precise control of airflow, such as in thermal power plants. Their modular design allows for easy assembly, disassembly, and access for cleaning and inspection, making them preferable to permanent welds or direct connections.

The global Ducting Flange market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
