Dust explosion-proof permanent magnet motor is a motor designed for flammable and explosive dust environments. It uses permanent magnet materials (such as NdFeB) as the magnetic field source and has high energy efficiency and reliability. The motor is treated with explosion-proof technology to prevent sparks, overheating or other dangers that may cause explosions during operation, ensuring the safe operation of the equipment in environments containing combustible dust such as coal mines, chemical plants, metallurgical plants, and grain processing. Dust explosion-proof permanent magnet motors usually comply with international explosion-proof standards (such as ATEX, IECEx, UL, etc.) and are widely used in drive systems in high-risk industries to ensure the safety and stability of the production process.

United States market for Dust Explosion-Proof Permanent Magnet Motor is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
