Disposable dust-free film cabin: It uses the principle of electrostatic adsorption to absorb dust, ensure the clean environment during the film application process, and prevent dust from affecting the film application effect. When using, put the mobile phone into the dust-free film cabin, remove dust through the principle of electrostatic adsorption, and then apply the film.

Reusable dust-free film cabin: Replace the disposable release film with a push-pull hanging card design, and remove bubbles and dust by repeatedly pushing and pulling. At the same time, the dust-free strip in the cabin can be replaced for multiple uses. When using, put the mobile phone into the dust-free film cabin, and apply the film through the push-pull hanging card design. After completion, the dust-free strip can be replaced for next use.

The dust-free film cabin is a practical mobile phone film auxiliary device. It improves the success rate and convenience of film application by removing dust in the film application environment. When selecting and using the dust-free film cabin, it is necessary to select and operate according to the actual situation to ensure the best film application effect.
