Dustproof racks are racks that have been designed to protect against dust. They are used for protecting items in racks, such as PCs and precision equipment, from dust.

Manufacturing plants, distribution centers, and other facilities are equipped with a variety of machines, such as conveyor belts and work robots. In conjunction with this, many PCs are installed to control these machines. In most cases, these facilities generate more dust than offices and other such facilities, so it is necessary to provide dustproofing for the equipment.
