According to our LPI (LP Information) latest study, the global DUV and EUV Photoresist market size was valued at US\$ million in 2022. With growing demand in downstream market and recovery from influence of COVID-19 and the Russia-Ukraine War, the DUV and EUV Photoresist is forecast to a readjusted size of US\$ million by 2029 with a CAGR of % during review period.

The research report highlights the growth potential of the global DUV and EUV Photoresist market. With recovery from influence of COVID-19 and the Russia-Ukraine War, DUV and EUV Photoresist are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of DUV and EUV Photoresist. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the DUV and EUV Photoresist market.

DUV and EUV photoresists are key materials used in semiconductor manufacturing and function as photoresists under different wavelength conditions. DUV photoresist is mainly used in deep ultraviolet lithography process. Its light source is usually neon fluoride laser or halogen lamp, which has high resolution and long practical application history. EUV photoresist is mainly used in the extreme ultraviolet lithography process, and its light source is a laser plasma light source of extreme ultraviolet light (wavelength 13.5 nanometers). EUV photoresist has shorter wavelengths and higher energies, enabling smaller linewidths and higher resolutions.

DUV photoresists use longer wavelengths of ultraviolet light, and EUV photoresists use shorter wavelengths of extreme ultraviolet light. Photoresist is an important part of the photolithography process and is closely related to equipment such as photolithography machines, masks, and other process steps. In practical applications, selecting the appropriate photoresist requires taking into account specific process requirements, manufacturing costs, equipment compatibility and other factors.
