Abstracts

The global DUV Photoresists market size is predicted to grow from US\$ 406 million in 2025 to US\$ 1558 million in 2032; it is expected to grow at a CAGR of 21.6% from 2026 to 2032.

The demand for DUV photoresists is influenced by the continued advancement of semiconductor manufacturing processes. As chipmakers transition to smaller nodes (such as 7nm, 5nm, and below), there is a need for higher resolution and sensitivity in photoresists.

The semiconductor industry is gradually adopting EUV lithography for advanced node manufacturing. This transition impacts the requirements for photoresists that can withstand EUV exposure.
