DVD ('digital versatile disc' or 'digital video disc') is a digital optical disc storage format. The medium can store any kind of digital data and is widely used for software and other computer files as well as video programs watched using DVD players. DVDs offer higher storage capacity than compact discs while having the same dimensions.

BD-DVD Disc (BD, BRD) is a digital optical disc data storage format. It was designed to supersede the DVD format, in that it is capable of storing high-definition video resolution (1080p). BDs use a blue-violet laser that has a shorter wavelength compare to a red laser. This allows BDs to store data more precisely using less space.

North America and Europe are main markets, they occupy about 60% of the global market. BD Player is the main type, with a share about 60%.
