The research report highlights the growth potential of the global DWI Can market. DWI Can are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of DWI Can. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the DWI Can market.

Two-pieces cans are developed in replaced of three-piece cans that cause lead pollution. The two-piece can is a packaging container with the bottom end and the body shaped from one sheet of metal by deep drawing, with a second end seamed to the can to close it and form a complete package for sale. As the whole can is composed of two pieces, it is known as the two-piece can.

Compared with the three-piece can, the two-piece can has the following advantages: (1) The can body has no side seam, and there's no seam between the body and the bottom end, so the can is tightly sealed with less consumption of raw materials; (2) The can body can be fully decorated and printed; (3) The can making process is easy and efficient. However, it also has some disadvantages. For example, it requires excellent performance of the can-making materials and a high investment in equipment. Besides, can-making technologies, equipment and dies must be excellent as well.

2-Piece Can report published by QYResearch reveals that COVID-19 and Russia-Ukraine War impacted the market dually in 2022. Global 2-Piece Can market is projected to reach US\$ 42260 million in 2029, increasing from US\$ 34420 million in 2022, with the CAGR of 3.0% during the period of 2023 to 2029. Demand from Beer and Carbonated Drinks are the major drivers for the industry.
