Electron Beam technology can modify the physical, chemical, molecular and biological properties of materials and products, improving their usefulness and enhancing their value.

Electron beam accelerator (E-beam Accelerator) is widely used for industrial applications such as surface curing, crosslinking of wires and cables and sterilization/decontamination of pharmaceutical products. The energy of the electron beam determines the type of applications. This is due to the penetration power of the electron that is limited by the energy.

North America is the largest region of E-beam Accelerator, with a market share more than 35%. It was followed by Europe with 30%. IBA, Wasik, Jiangsu Dasheng Electron Accelerator and LOTRON are the key manufacturers of industry, and they had about 70% combined market share.
