An Electronic Ink Shelf Label (E-ink shelf label or ESL) is a digital display technology used in retail environments for pricing and product information. Unlike traditional paper labels that need manual replacement and updates, electronic ink shelf labels are digital, allowing for dynamic and real-time changes in pricing and product details.

E-ink, short for electronic ink, is a display technology that mimics the appearance of traditional paper. It is characterized by high contrast, wide viewing angles, and low power consumption. E-ink displays are often bistable, meaning they can hold an image with little to no power. E-ink shelf labels enable retailers to update product information, prices, and promotions remotely and in real-time. This is especially useful for managing frequent price changes or promotions without the need for manual intervention. The use of electronic ink shelf labels can contribute to sustainability efforts by reducing the need for paper labels, minimizing waste, and providing a more eco-friendly solution.
