An Electronic Paper Shelf Label (E-paper shelf label or ESL) is a digital display technology used in retail environments for pricing and product information. Unlike traditional paper labels that need manual replacement and updates, electronic paper shelf labels are digital, allowing for dynamic and real-time changes in pricing and product details.

E-paper, short for electronic paper, is a display technology that mimics the appearance of traditional paper. It is characterized by high contrast, wide viewing angles, and low power consumption. E-paper displays are often bistable, meaning they can hold an image with little to no power. E-paper shelf labels enable retailers to update product information, prices, and promotions remotely and in real-time. This is especially useful for managing frequent price changes or promotions without the need for manual intervention. The use of electronic paper shelf labels can contribute to sustainability

E-paper shelf labels have become increasingly popular in modern retail environments, streamlining operations and enhancing the overall shopping experience for both retailers and customers.
